

WETLAND REHABILITATION SERVICES

HABITAT RESTORATION & ENVIRONMENTAL REMEDIATION

WETLAND REHABILITATION SERVICES

J.F. Brennan Company is an environmental remediation and marine construction company that focuses on providing quality construction services along the inland waterways of the United States. We are dedicated to the preservation and rehabilitation of environmentally sensitive wetlands with the use of specialized floating and amphibious equipment. Our reputation as an innovative contractor that stresses the importance of safety and environmental awareness has enabled us to become a preferred contractor for the U.S. EPA, U.S. Army Corps of Engineers, and other stakeholders in the fight to preserve our riverine ecosystem.

Habitat Restoration

- Protected Habitat Construction
- Emerging Wetland Development
- Scour and Erosion Prevention
- Hydrographic Survey

Environmental Remediation

- Contaminated Sediment Removal
- Material Transport and Separation
- Insitu Capping and Sand Covers
- Bathymetric Modeling
